

What is claimed is:

1 1. A keyboard covering and copy holding apparatus comprising:
2 a top plate member having downward extending left and right side panels; and
3 a bottom plate member having upward extending left and right side panels;
4 wherein each upward extending left and right side panel of said bottom plate member is
5 pivotably engaged with each respective downward extending left and right side panel of said top
6 plate member, such that said top plate member is rotatable with respect to said bottom plate
7 member about a pivot axis passing through said upward extending left and right side panels of
8 said bottom plate member and said downward extending left and right side panels of said top
9 plate member.

10 2. A keyboard cover and copy holder apparatus according to claim 1, further
11 comprising:
12 at least one flange extending downward from a back portion of said top plate member.

13 3. A keyboard cover and copy holder according to claim 1, further comprising:
14 at least one flange extending upward from a front portion of said bottom plate member.

15 4. A keyboard cover and copy holder according to claim 1, wherein each downward
16 extending left and right side panel and each upward extending left and right side panel has at
17 least one bore disposed therein.

18 5. A keyboard cover and copy holder according to claim 4, wherein each downward

2 extending left and right side panel is pivotably engaged with each respective upward extending
3 left and right side panel with at least one fastener positioned in an operable relationship through
4 each bore.
5

1 6. A keyboard cover and copy holder according to claim 1, wherein each upward
2 extending left and right side panel of the bottom plate member is pivotably engaged with each
3 respective downward extending left and right side panel of said top plate member with a fastener.
4

1 7. A keyboard cover and copy holder according to claim 6, wherein said fastener is
2 selected from the group consisting of: a screw; a wing nut; a snap lock; a bolt; a tongue and
3 groove; a rivet; a hook; a post; a clip; a plug; an anchor; a peg; a binder; a catch; a clamp; a
4 clasp; a dowel; a pin; and a cleat.

1 8. A keyboard cover and copy holder according to claim 7, wherein said fastener
2 comprises a wing nut, washer and bolt.
3

1 9. A keyboard cover and copy holder according to claim 1, wherein said top plate
2 member and said bottom plate member are comprised of a polymeric material.
3

1 10. A keyboard cover and copy holder comprising:
2 a polymeric top plate member having downward extending left and right side panels;
3 one flange extending downward from a rear portion of said top plate member;
4 at least one bore disposed within each downward extending left and right side panel;
5 a polymeric bottom plate member having upward extending left and right side panels;

Cone

- 6 at least one flange extending upward from a front portion of said bottom plate member;
 - at least one bore disposed within each upward extending left and right side panels; and
 - 8 at least one fastener positioned in an operable relationship to each bore for pivotably engaging
 - 9 said top plate member to said bottom plate member for relative rotation on a pivot axis between a
 - 10 substantially parallel configuration and an angled configuration of said top plate member and
 - 11 said bottom plate member.
